She Sees EVERYTHING

...And she loves detail. The newest eyeglasses are all about detail. It might be the always fashionable use of black and white—or the currently hot crystal—solo or in combo. A stunning starburst of jewels. Or a rich texture. That energizing blast of color—whether it be seafoam green or burgundy. A beloved logo or signature accent. You never know what will strike a woman's fancy. But we do know she has her eye on that perfect detail.
